FATAL TO GOOD LOOKS

Thin Blood and Nervousness Will Quickly Wreck Beauty.

Pale people are generally nervous. Thin blood not only affects the complexion by robbing cheeks and lips of color but it also weakens the nerves by robbing them of nourishment.

When you have so far lost control of your nerves that you "fly to pieces" over the least little noise or excitement, it is high time to give your nerves a rest and to build up your blood. The drawn look, the sunken eyes, the deepening lines about the mouth and forehead, the loss in weight, are plain signs that the nerves and the body are being poorly nourished.
